It is respectfully requested that the cited references be expressly considered during the prosecution of this application, and the references be made of record therein and appear among the "references cited" on any patent to issue therefrom.

As provided for by 37 CFR §1.97(h), no inference should be made that the information and references cited are material to patentability. Also, no inference should be made that a reference is prior art merely because it is included in this statement. Under 37 CFR §1.97(g), the submission of an Information Disclosure Statement should not be considered as representation that a search has been made.

Reference LU is a report summarizing references cited by the applicants or the Examiner in applications of which priority is claimed. Examiners have a duty to consider art references of parent patent applications. *See* 37 CFR §1.98(d); MPEP §609. The Examiner is respectfully requested to initialize the box adjacent to the LU reference listing to indicate that the Examiner has considered the references of record in the applications of which priority is claimed under 35 USC §120. Applicants also submit reference LV, a report categorizing certain submitted references into various categories. The report attached as reference LV is intended to assist the Examiner in the Examiner's review of the considerable number of references submitted. Applicants will also supply, at the Examiner's request, a computer accessible file that facilitates computer text searching of U.S. patent references that have been submitted.

Applicants believe that a fee is required for submission of this statement. A check in the amount of \$180.00 is enclosed.

The Commissioner is hereby authorized to charge any additional fees associated with this communication or credit any overpayment to Deposit Account No. 50-0289.

Respectfully submitted,

WALL MARJAMA & BILINSKI LLP
